

Our offer

- Integration of biomarker expertise between **academia and CRO's**
 - Collaboration with **biobanks and cohorts** (healthy participants/patients)
 - Extensive **database of biomarker assays**, validated in research and in clinical setting
 - Collaboration with **key-opinion leaders** in relevant therapeutic areas
 - High flexibility for **assay development and bioanalysis**
-

“We assist and support in each step of the biomarker workflow”

Biomarker Bay

What is BiomarkerBay?

BiomarkerBay brings together **academic expertise** and **contract research organizations** to provide integrated services for the validation, bioanalysis and clinical testing of novel biomarkers and companion diagnostics

“BiomarkerBay helps to improve the communication between customers and suppliers, between commercial entities and academics, helping them ‘to speak the same language’ ”

Our services and capabilities for your biomarker research

Discovery & Confirmation

- Multi-omics strategies for discovery of promising biomarkers
- Advanced data processing and statistical analysis

Assay development

- Fit-for-purpose solutions
- Small and large molecules analysis on LC-MS/MS
- Expertise in immunobioanalysis
- Metabolic profiling

Assay validation

- Complete range of validation, from research setting to full GLP
- Application of own developed or commercially available assays

Bioanalysis & Clinical validation

- Collaborations with biobanks and cohorts (healthy participants/patients)
- Extensive list of validated assays
- Expertise in bioanalysis, immunoassays and LC-MS/MS
- (Pre)-clinical validation of biomarkers

Regulatory approval & adoption

- Development and production of diagnostic kits and IVD registration

Biomarker Bay

“Your place to do biomarker business”
